Using the Smart Card

Your notebook is equipped with a built-in smart card reader that allows you to make secure purchases, store security information, and provide identification and information using a smart card.

    1. Open the I/O port cover.
   2. Insert a smart card into the smart card slot.

    3. Close the I/O port cover.

Connecting the Microphone/Headset

Your notebook is equipped with an audio combo jack that enables you to use a headset or microphone.

    1. Open the I/O port cover.
    2. Plug the stereo headphones cable into the audio combo jack of your device.

NOTE
- A headset and microphone are not included in the package for this device. They are sold separately.
